

Stadium Lights Guide

Stadium lights may only be used if they were requested as part of your reservation and all applicable lighting fees have been paid.

If the Concession Stand Is Open:

- Ask a concession stand staff member to turn on the stadium lights.
- Please give staff plenty of notice, as they may be assisting customers.
- When your game is over, follow the **Shutting Off the Lights** instructions below.

If the Concession Stand Is NOT Open:

- Locate the stadium light controls behind the third-base dugout, inside the wooden fence.
- The padlock on the gate will be unlocked, even though it may appear locked when you approach it. Remove the padlock to open the gate.
- The first three switches on the right control the stadium lights. Turn on all three switches to operate the lights.
- After turning on the lights, place the padlock back on the gate as you found it, but DO NOT lock it.
- When your game is over, follow the **Shutting Off the Lights** instructions below.

See the photos below for the location of the controls and switches.

Shutting Off the Lights

Regardless of who turned the lights on, the renter is responsible for shutting them off when the game is over.

- Turn the first three switches on the right to the OFF position.
- Secure the gate with the padlock before leaving.

See the photos below for the location of the controls and switches.
